## About me

---

Frontend Developer with hands-on expertise in React.js, JavaScript (ES6+), and REST API integrations. Proven ability to write clean, reusable code, debug complex UI issues, and build high-performance web applications. Eager to collaborate with cross-functional teams to drive innovation and optimize user experiences

## Technologies

---

**Languages:** Javascript (ES6) , HTML5, CSS3

**Frontend:** React.js, SCSS (Sass), Tailwind CSS, Context API, JSX , React Router DOM

**Tools:** Git, GitHub, Vercel, Vite, REST API . npm

**Basics:** Node.js

## Internship

---

Motherson Group, ADAS Data Annotator Intern

December 2025 – March 2026

## Projects

---

### SHOPLY - MODERN E-COMMERCE FRONTEND

[Github Repo](#) | [Live Link](#)

- **Architected a responsive e-commerce web application** using React.js and Tailwind CSS, delivering a premium user experience with custom CSS animations and modern UI components.
- **Integrated Axios for asynchronous REST API data fetching**, and implemented Context API for efficient global state management, effectively eliminating prop-drilling across the app.
- **Developed a dynamic product discovery system** featuring real-time search, category-based filtering, and advanced sorting (by price and rating) to optimize user navigation.
- **Configured Client-Side Routing** using React Router DOM for seamless transitions between the Home, Product Gallery, and Dynamic Product Detail pages (/products/:id).
- **Tools Used:** React.js, Tailwind CSS, Context API, React Router DOM, Axios.

### PROGRESS MANAGEMENT DASHBOARD

[Github Repo](#) | [Live Link](#)

- **Architected a centralized productivity dashboard integrating** multiple distinct tools (Weather, Timer, Tasks) into a unified, responsive user interface.
- **Integrated third-party RESTful APIs (e.g., OpenWeatherMap)** to fetch and render real time environmental data like temperature and humidity using asynchronous JavaScript (**Async/Await**).
- **Implemented a dynamic "Random Quote"** generator that consumes external API endpoints to display randomized programming snippets or quotes, focusing on efficient JSON data parsing and error handling.
- **Engineered a custom "Focus Clock"** feature with precise countdown logic and state management to track productivity sessions, utilizing JavaScript intervals.
- **Developed a time-based goal tracking system** that allows users to schedule and manage daily tasks dynamically, using DOM manipulation for real-time updates.
- **Tools Used:** HTML5 , CSS3 , JAVASCRIPT(ES6+) , REST APIs.

## Education

---

Delhi Skill and Entrepreneurship University, Bachelor of Computer Applications

October 2023 – May 2026

## Bootcamp / Course

---

**Data Science Workshop:** Ducat

**MERN STACK :** [Sheryians Coding School](#)
