About me

Frontend Developer specializing in React.js with hands-on experience building interactive UIs, REST API integrations, and scalable web applications. Recently built a browser-based Mac OS portfolio featuring draggable windows, a custom CLI terminal, and dynamic theming — demonstrating strong component architecture and performance optimization skills. Currently expanding into backend development with Node.js.

Technologies

Languages: Javascript (ES6+), HTML5, CSS3

Frontend: React.js, SCSS (Sass), Tailwind CSS, Context API, JSX, React Router DOM, Responsive Design

Tools: Git, GitHub, Vercel, Vite, REST API, npm

Libraries: react-rnd, Axios, Lottie Animations, React Markdown, react-console-emulator

Basics: Node.js

Internship

Motherson Group, ADAS Data Annotator Intern

December 2025 – May 2026

Projects

MAC OS PORTFOLIO — INTERACTIVE DESKTOP EXPERIENCE

[Github Repo](#) | [Live Link](#)

- **Engineered a browser-based Mac OS desktop simulation** using React.js and SCSS, featuring fully draggable, resizable windows with real-time close/minimize/fullscreen controls via react-rnd.
- **Built a custom CLI terminal** with 10+ interactive commands including dynamic project navigation — users can type 'project 2 live' to directly open live demos from the terminal.
- **Implemented a performance-optimized wallpaper switcher** supporting image and video backgrounds, using CSS opacity transitions to eliminate re-mounting and reduce load time.
- **Integrated multiple embedded apps** — Spotify player, GitHub project showcase, Resume viewer, and Notes — managed via centralized React state.
- **Tools Used:** React.js, SCSS, Vite, react-rnd, Vercel.

SHOPLY - MODERN E-COMMERCE FRONTEND

[Github Repo](#) | [Live Link](#)

- **Architected a responsive e-commerce web application** using React.js and Tailwind CSS, delivering a premium user experience with custom CSS animations and modern UI components.
- **Integrated Axios for asynchronous REST API data fetching**, and implemented Context API for efficient global state management, effectively eliminating prop-drilling across the app.
- **Developed a dynamic product discovery system** featuring real-time search, category-based filtering, and advanced sorting (by price and rating) to optimize user navigation.
- **Configured Client-Side Routing** using React Router DOM for seamless transitions between the Home, Product Gallery, and Dynamic Product Detail pages (/products/:id).
- **Tools Used:** React.js, Tailwind CSS, Context API, React Router DOM, Axios.

Education

Delhi Skill and Entrepreneurship University, Bachelor of Computer Applications

October 2023 – May 2026

Bootcamp / Course

Data Science Workshop: Ducat

MERN STACK : [Sheryians Coding School](#)
